Effective October 19, BNSF to Enforce Parking Compliance Initiative at its Logistics Park Kansas City Intermodal Facility

To improve traffic flows at its Logistics Park Kansas City Intermodal Facility, BNSF will be introducing new compliance measures for drivers who do not follow parking instructions. As [announced last year](#), Hub personnel are required to identify trucking partners who do not park in their designated parking spot. Specific instructions to support compliance may be accessed in the following ways:

- RailPASS users can look up their designated parking location in RailPASS
- Non-RailPASS users in a standard ingate lane will find their designated parking location at the ingate kios
- Non-RailPASS users in a RailPASS only lane will find their designated parking location on a printed J1, which is now available from a kiosk in the Driver Assistance Building (DAB)

Trucking partners who are unable to park according to their instructions may park in a nearby space, but must update their location through RailPASS or by alerting the DAB (Driver Assistance Building).

Effective October 19, 2020, drivers who do not follow parking instructions will be restricted from entering its Logistics Park Kansas City Intermodal Facility for a minimum of one week. The duration of the restriction will increase with recurring parking violations. Trucking companies will be notified via email of drivers who have parking violations.

If you have any questions regarding your shipment(s), please contact BNSF Customer Support at 1-888-428-2673.

This Facility Update is intended to inform BNSF customers of changes related to specific facilities.
