

Releasing **NOTHING** means everything to us.

Congratulations to the winners of the 13th Annual BNSF Product Stewardship Awards who achieved zero non-accident releases (NARS) of hazardous materials in 2009. BNSF salutes these companies who share our commitment to safety and concern for the environment. Thank you for protecting employees, the public, and the planet.

BNSF Honors 93 Shippers for Safe Transport of Hazardous Materials at 13th Annual Product Stewardship Awards Event

FORT WORTH, Texas, April 20, 2010—BNSF Railway Company (BNSF) today honored 93 shippers with BNSF's Annual Product Stewardship Award for the safe transportation of hazardous materials by rail during 2009.

These 93 award-winning companies have successfully implemented the ethics of Product Stewardship under the American Chemistry Council's Responsible Care® initiative. Last year, BNSF presented 86 customers with its Stewardship Award.

"This is a record year for the number of customers who have received BNSF's Stewardship Award. We are pleased that each year the number of customers receiving this award grows. It demonstrates our customers and the rail industry's focus on the safe transportation of hazardous materials," Katie Farmer, BNSF vice president, Industrial Products Sales, said at a special presentation at BNSF's corporate headquarters in Fort Worth. "The product stewardship of these 93 customers helps support the safety of our employees, the communities we serve and the environment."

Implemented in 1997, BNSF's Product Stewardship Award is presented to shippers who transported a minimum of 500 loaded tank cars of hazardous materials during the previous year with zero non-accident releases (NARs) during the entire transportation cycle.

The honorees for 2009 performance are:

About BNSF

BNSF Railway is one of North America's leading freight transportation companies operating on 32,000 route miles of track in 28 states and two Canadian provinces. BNSF is one of the top transporters of consumer goods, grain, industrial goods and low-sulfur coal that help feed, clothe, supply, and power American homes and businesses every day. BNSF and its employees have developed one of the most technologically advanced, and efficient railroads in the industry. And we are working continuously to improve the value of the safety, service, energy, and environmental benefits we provide to our customers and the communities we serve.
