

# Port of Pasco

Located on the Columbia River in southeast Washington State, the Port of Pasco owns one of the farthest inland barge terminals on the Columbia River. The port manages 2,000,000 square feet of industrial space, with miles of industrial rail, a barge slip providing 1,000 feet of wharfage, and the Tri-Cities Airport. The port connects people and products whether by air, land or water, and helps businesses grow by offering space for building, manufacturing, processing and creating. The Port of Pasco grows the economy by creating opportunities for investment and growth.

## TERMINAL CAPABILITIES
